Profile No. 1 February 28, 1958

Location - ½ mile east of Village on island road.

Deep fine coral sand under coconut plantation. Slight depression - 100 yards from beach.

Ground cover of Fimbristylis and Lepturus. Area is surrounded with Scaevola on higher ridges.

Grass roots to 20".

Field pH
A 8.35
B 8.5
C 8.8
D 9.1
E 9.1

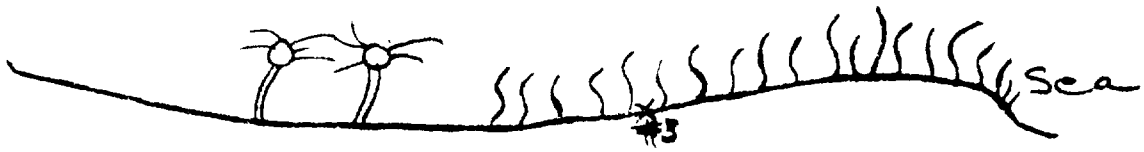
Profile No. 3 March 1, 1958

South of #1.



Scaevola forest area between Coconut plantation and windward sea. Dense forest. Guettarda tree over plot. Also scattered Pandanus - Coconuts.

This area has scattered coral beach rock throughout the fine coral -- probably thrown in by storms.
